

FORTILINE HDPE PIPE SOLUTIONS

Fortiline's HDPE Fusion Group can assist customers with the growing use of fusible HDPE products, particularly in water and wastewater applications. HDPE pipe is durable, cost-effective, and can be used in industrial, municipal and landfill applications.

Fortiline's knowledge of HDPE fusion techniques, equipment and training gives customers the right solutions for their HDPE needs. Our Group leadership, based in Charlotte, N.C., has nearly 60 years of HDPE experience, so customers can count on Fortiline to provide expert guidance on any HDPE project.
